

## 2007 Enrolled Student Survey

The Enrolled Student Survey (ESS) was created by Cornell and a research consortium of other private, selective institutions. The ESS asks students about their involvement in various academic and extracurricular activities, their interactions with faculty and students, and their perceptions of their undergraduate experience.

The 2007 Enrolled Student Survey was administered via the web in the spring of 2007 to all undergraduate students. 3,498 students responded to the survey, yielding an overall response rate of 27%.

The results of the 2007 Enrolled Student Survey are displayed in the tables that follow. It may be most useful to refer to the survey instrument first in order to locate questions of interest. Then, the corresponding tables can be found using the bookmarks (by clicking on the bookmark image  to the left) or by using the search function within Adobe Reader.

On the first line of each table, the responses for the applicable question on the survey are presented for Cornell University as a whole. The responses for Cornell as a whole are compared to the survey results of students within three different "norm groups." These groups are comprised of colleges and universities against whom, when in direct competition for commonly-admitted undergraduate students, Cornell more often "loses" (Preferred to Cornell), competes relatively evenly (Head-to-Head) and more often "wins" (Cornell Preferred). In addition, in order to highlight differences within Cornell, frequencies are presented by race/ethnicity, class year, gender, and undergraduate college.

Q1. During the current school year, how often have you worked on a class assignment, project, or presentation with other students?		% Responding			
		Never	Occasionally	Often	Very Often
Cornell and Norm Groups**					
	Cornell	5.99	46.03	26.58	21.4
