2011 Cornell PULSE

The Cornell PULSE (Perceptions of Undergraduate Life and Student Experiences) Survey asks currently enrolled undergraduate students about their involvement in various academic and extracurricular activities, their interactions with faculty and students, and their perceptions of their undergraduate experience.

The 2011 Cornell PULSE was administered via the web in spring 2011. Of the 13,480 undergraduate students invited to complete the survey, a total of 6,821 students responded, yielding a 51% response rate.

The results of the 2011 Cornell PULSE are displayed in the tables that follow. It may be most useful to refer to the survey instrument first in order to locate questions of interest. Then, the corresponding tables can be found using the bookmarks (by clicking on the bookmark image to the left) or by using the search function within Adobe Acrobat Reader.

On the first line of each table, the responses for the applicable question on the survey are presented for Cornell undergraduate students as a whole. The responses of Cornell undergraduates are compared to the survey results of students from two different "norm groups." These groups include "Other Ivies" (the seven other Ivy League universities) and "Non-Ivies" (eleven non-Ivy research universities). In order to highlight differences within Cornell, frequencies are also presented by class year, gender, race/ethnicity, and undergraduate college.
